

Exercise title

EX1-Add-Numbers

Type of Application

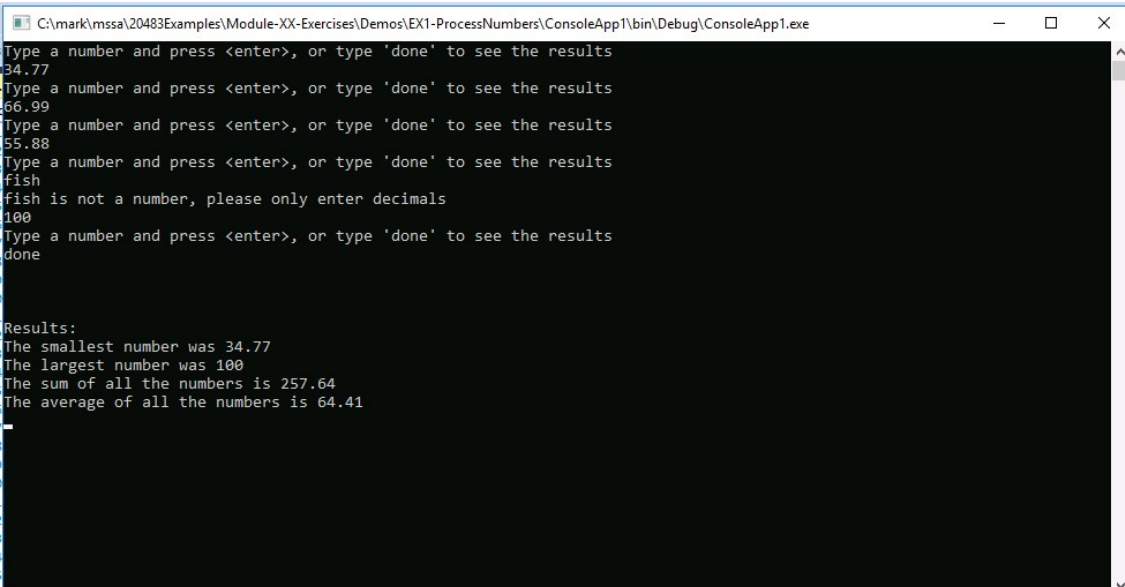

Console Application

Overview

The purpose of this exercise is to implement a simple console application and store the code in a github repo. We'll all be sharing the same repo and you need to create your solution in a folder that matches your name.

I'll add the url of the repo you need to clone in the chat window.

The application works as follows:

```
C:\mark\mssa\20483Examples\Module-XX-Exercises\Demos\EX1-ProcessNumbers\ConsoleApp1\bin\Debug\ConsoleApp1.exe
Type a number and press <enter>, or type 'done' to see the results
34.77
Type a number and press <enter>, or type 'done' to see the results
66.99
Type a number and press <enter>, or type 'done' to see the results
55.88
Type a number and press <enter>, or type 'done' to see the results
fish
fish is not a number, please only enter decimals
100
Type a number and press <enter>, or type 'done' to see the results
done

Results:
The smallest number was 34.77
The largest number was 100
The sum of all the numbers is 257.64
The average of all the numbers is 64.41
